

Dixon Frederick

Software Engineer

📍 North Jakarta, Indonesia

I'm a Software Engineer and Computer Science graduate from Universitas Indonesia with experience building software products and working across different systems and platforms. I enjoy solving problems that require both technical depth and a clear understanding of how users and businesses actually work. My experience has involved developing new features, improving existing systems, connecting applications, and making software more reliable and easier to maintain. Comfortable working with evolving requirements, learning unfamiliar tools when needed, and collaborating with others to turn ideas into practical solutions.

Work Experience

Software Engineer • Sanka

September 2024 ~ May 2026 • 1 year 9 months

- Integrated Sanka with more than 10 CRM, e-commerce, POS, and ERP platforms, including HubSpot, Shopify, and Salesforce, enabling reliable data synchronization across external systems.
- Built and maintained custom applications, extensions, and automated workflows for third-party platforms such as HubSpot and Shopify.
- Optimized key Sanka features by migrating django template-based pages to a React and API-driven architecture, improving application responsiveness and delivering a smoother user experience.
- Developed and maintained end-to-end automated tests for critical user workflows, helping identify regressions early and improve reliability.
- Resolved more than 5 customer-reported issues and/or feature requests per day.
- Collaborated with a team of more than 6 developers through daily meetings to review customer tickets, align development plans, and resolve technical issues.

Teaching & Research Assistant • Universitas Indonesia

February 2023 ~ July 2024 • 1 year 6 months

- TA for Discrete Mathematics & Intro to Computer Organization
- Migrate, configure, and run simulations on LAMMPS (Large-scale Atomic/Molecular Massively Parallel Simulator)
- Test and debug simulation results on 10+ scenarios and environments

Back End Developer • PT. Pharos Indonesia

August 2023 ~ December 2023 • 5 months

- Develop and maintain 10+ django widgets for backend driven UI app framework
- Develop Stock Management system (database, models, APIs, and pages)

Education

Universitas Indonesia
Computer Science

2020 - 2024

SKILLS

- | | | |
|-------------------|--------------------------------|--------------------------|
| - Python / Django | - HTMX / CSS / JS | - Microsoft Office |
| - Java / Spring | - Figma, Jira, Linear, Hatchet | - SQL: PostgreSQL, MySQL |
| - React / Node | - SQA & Unit Testing | - English: Professional |
