

Dixon Frederick

Software Engineer

📍 North Jakarta, North Jakarta City,
Jakarta, Indonesia

Computer Science graduate from Universitas Indonesia and a Google Cloud Certified Associate Cloud Engineer. I'm currently a Software Engineer at Sanka, where I build and integrate systems across e-commerce, POS, and ERP platforms, develop, and ship features for Sanka ERP.

I enjoy working on backend and full-stack problems; designing APIs, modeling data, and building reliable workflows while keeping code maintainable and easy to scale. I'm a fast learner who likes turning ambiguous requirements into clear, working solutions.

Work Experience

Software Engineer • Sanka

September 2024 ~ Now • 1 year 6 months

- Integrate Sanka with various EC, POS, and ERP platforms (Hubspot, Shopify, Salesforce, etc)
